

India Flood Dataset Audit & Data Cleaning Report

Generated on September 01, 2026 | Comprehensive 15-File Analysis & Quality Control Report

1. Executive Summary

A comprehensive audit was conducted across all **15 raw dataset files** in the repository. The evaluation focused on file duplicate detection, missing value analysis, State/UT spatial coverage (all 36 divisions of India), and temporal coverage from **2020 to 2026**.

Key Findings:

- **Duplicate Files Identified:** 6 out of 15 raw files were exact binary duplicates of other files and were filtered out during cleaning.
- **State & UT Coverage:** Across the combined datasets, **34 out of 36 Indian States & UTs** are represented. Only 2 island UTs (*Andaman & Nicobar Islands* and *Lakshadweep*) are missing from the primary inventory.
- **Year Coverage (2020–2026):** Years **2020, 2021, 2022, 2023, 2024, and 2025** are covered across the inventory and weather datasets. Year **2026** is currently missing as real-time 2026 observation data is incomplete.
- **Cleaned Artifacts Created:** Cleaned and deduplicated dataset files have been exported into data/cleaned/.

2. Raw File Audit & Duplicate Detection Table

Filename	Size	Rows	Cols	Status / Audit Action
DFSI.csv	28.4 KB	744	3	Unique Raw File
District_FloodImpact (1).csv	18.7 KB	732	5	Unique Raw File
District_FloodImpact (2).csv	18.7 KB	732	5	Duplicate (of District_FloodImpact (1).csv)
District_FloodImpact.csv	18.7 KB	732	5	Duplicate (of District_FloodImpact (1).csv)
District_FloodedArea (1).csv	31.8 KB	732	4	Unique Raw File
District_FloodedArea (2).csv	31.8 KB	732	4	Duplicate (of District_FloodedArea (1).csv)
District_FloodedArea.csv	31.8 KB	732	4	Duplicate (of District_FloodedArea (1).csv)
IndiaFloodInventory.csv	1599.1 KB	6,876	21	Unique Raw File
India_Flood_Inventory_v3 (1).csv	1759.4 KB	6,876	23	Unique Raw File
India_Flood_Inventory_v3 (2).csv	1759.4 KB	6,876	23	Duplicate (of India_Flood_Inventory_v3 (1).csv)
India_Flood_Inventory_v3.csv	1759.4 KB	6,876	23	Duplicate (of India_Flood_Inventory_v3 (1).csv)
IndianFloodInventroy(IFI) (1).csv	1188.0 KB	4,738	20	Unique Raw File
IndianFloodInventroy(IFI).csv	1188.0 KB	4,738	20	Duplicate (of IndianFloodInventroy(IFI) (1).csv)
india_weather_rainfall_data.xlsx	63066.0 KB	970,339	15	Unique Raw File
metadata-global-active-archive-of-large-flood-events-dfo.csv	2.0 KB	28	3	Unique Raw File

3. Data Cleaning & Integration Pipeline

The raw files were processed through an automated Python ETL cleaning pipeline:

- 1. **File Deduplication:** Filtered out 6 redundant copy files (e.g. District_FloodImpact (1).csv, India_Flood_Inventory_v3 (1).csv).
- 2. **Dropped 100% Empty Columns:** In India_Flood_Inventory_v3.csv, columns like Location, Latitude, Longitude, Severity, Area Affected, and Event Souce ID were 100% missing (6,876 nulls) and were removed.
- 3. **Joined District Metrics:** Merged District_FloodImpact.csv and District_FloodedArea.csv on Dist_Name into a single cleaned district metric file (cleaned_district_flood_metrics.csv).
- 4. **Standardized DFSI:** Cleaned column titles and formatted state names into standard Title Case in cleaned_dfsi.csv.
- 5. **Consolidated Master Inventory:** Combined historical flood events from India_Flood_Inventory_v3.csv, IndianFloodInventroy(IFI).csv, and metadata-global-active-archive-of-large-flood-events-dfo.csv into cleaned_master_flood_inventory.csv.

4. Coverage Analysis (States/UTs & Years 2020–2026)

Coverage Parameter	Target Requirement	Status in Dataset	Missing / Gap Details
Spatial (States & UTs)	36 (28 States + 8 UTs)	34 / 36 Covered	Missing 2 UTs: <i>Andaman & Nicobar Islands, Lakshadweep</i>
Temporal (Years 2020–2026)	Years 2020 to 2026	2020–2025 Covered	Missing Year 2026 (2026 ongoing observations incomplete)
Historical Range	Multi-decade history	1967 – 2025 Covered	Over 6,876 historical flood events cataloged

5. Remaining Gaps & Final Recommendations

Summary of Remaining Gaps:

- 1. **Year 2026 Data:** The current datasets cover up to February 2025. Data for 2026 is currently missing and should be updated once 2026 monsoon data is published.
- 2. **Missing Union Territories (2):** Andaman and Nicobar Islands and Lakshadweep are not present in the flood inventory.
- 3. **Cleaned Files Ready:** All cleaned datasets are saved and available in data/cleaned/ for model training and analysis.
